2. List of major features and additional technical features required
    a. allows users to login to an account, database
    b. allows users to create chores and task, database
    c. reminds users to complete their chore, push notifications
    d. allows users to notify others when their chore is complete, push notification and network
    e. user can send out notifications to other in their group to remind them of task/chore/bills, network and push notification
    f. users can submit pictures of their chore completed, camera and database
3. My app is targeted at college students that have roommates. The app should look simple and easy to use since college students are often very busy juggling work and school, they will not want to take the time to learn how to use a complicated app.
4. The app is a roommate organization tool for college students. Often roommates tend to be messy leaving dishes sitting out all day and letting the trash pile up. No one wants to take on the responsibility of tracking everyone's chores or nagging their friends about keeping the house

clean. My app will do the nagging for you! Just enter the desired chores and frequency the app will remind users to complete their chores.
